公司简介

Introduction

常熟开关制造有限公司是国有资产参股的电器制造企业、“国家重点高新技术企业”，占地约300亩，员工1500人。主要生产中低压电器元件、工控产品、太阳能光伏逆变器、成套装置等，可以为您提供“智能配电系统三位一体完整的解决方案”。

公司建有博士后科研工作站、省级企业技术中心和江苏省电器控制工程中心，具有一支以博士、硕士、本科生为主的多层次研发队伍，工程技术人员占企业员工总数的45%左右。公司拥有先进的模具制造、零部件自动化生产、断路器装配自动检测流水线等一大批先进的制造和试验检测设备；实施以ERP管理为重点的信息化、网络化管理；完善质量/环境/职业健康安全体系，确保为用户提供优质、安全、可靠的产品。公司“”商标被国家工商行政管理总局认定为中国驰名商标，CM系列塑料外壳式断路器、CW系列智能型万能式断路器曾双双被评为中国名牌产品。

Changshu Switchgear Mfg. Co., Ltd. (Former Changshu Switchgear Plant), an enterprise with state-owned equity, covered an area of 300,000 m², with 1500 staffs, is a "National Key New High-tech Enterprise" and mainly produces HV and LV electrical components, industry control products, solar photovoltaic inverters and complete sets of equipment etc, all of which could provide trinity and complete solutions for intelligent power distribution system.

Post - doctoral scientific research station, Province Enterprise Technique Center and Jiangsu Province Electrical Apparatus Control Engineering Research Center have been established and a multi-level professional technique team has been formed consisting of PHD candidates, postgraduates and university graduates. Engineers and technicians have covered 45% of all staffs.

Advanced mould manufacturing equipments, automation producing equipments for spare parts, assembling and inspecting lines for breakers and test equipments have been brought in. Meanwhile, information and network management, taking ERP management as the focal point, has been applied and quality environmental systems (ISO9001/ISO14001/OHSMS18001) have also been established and perfected to ensure reliability and safety for customers.

The registered trademark  has been recognized as Famous Trademark of China by State Administration for Industry and Commerce of China. And CM Series Moulded Case Circuit Breaker and CW Series Intelligent Air Circuit Breaker are both China Top Brand products.

●FCX3智能配电监控器

优秀特色

- 获得国际认可的CB证书
- 具有体积小、分断高、带隔离等特点

额定极限短路分断能力： I_{cu} ：85kA ~ 100kA

额定运行短路分断能力： I_{cs} ：50kA ~ 65kA

额定短时耐受电流 I_{cw} （1s）：5kA ~ 10kA

- 基于微处理器技术的电子可调脱扣器，具有精确的三段保护功能
- 短路保护具有后备保护，由后备磁脱扣实现快速脱扣，限制了短路电流，并确保断路器可靠分断
- 基于Modbus-RTU协议的通信断路器，通过本公司的CN1DP适配器、CN1EG以太网适配器可应用于Modbus、Profibus、Devicenet、CAN总线和以太网通信网络，方便用户进行多种协议的应用管理
- 通过配置FDM3短消息通知模块，可实现断路器故障脱扣或报警信息无线监视
- 可配FWB1温度报警模块，实现连接点在线超温报警

CM1z系列智能型可通信塑壳断路器（以下简称断路器），是本公司采用先进的CAD/CAM/CAE设计、制造技术，研制、开发的新型断路器。其额定绝缘电压为800V，适用于交流50Hz，额定工作电压400V，额定电流至800A的电路中作不频繁转换之用。断路器具有过载长延时反时限、短路短延时反时限、短路短延时定时限、短路瞬时和欠电压保护功能，能保护线路和电源设备不受损坏。

- 断路器具有体积小、分断高、飞弧短、带隔离、抗振动等特点。

- 断路器可垂直安装（即竖装），亦可水平安装（即横装）。

- 断路器不可倒进线，即只能 1、3、5 接电源线，2、4、6接负载线。

- 断路器适用于隔离，符号表示为“”。

- 断路器产品执行下列标准：

IEC60947-1及GB14048.1-2006 总则

IEC60947-2及GB14048.2-2008 断路器

及附录F 带电子过电流保护断路器的附加试

验

- 断路器获国家强制性产品认证“CCC”标志。

CM1z Series Moulded Case Circuit Breakers (hereafter simply referred to as breakers) are one of the new type breakers which have been developed by the company using international advanced design and manufacturing technology. The rated insulation voltage of the breakers is 800V. In the circuit of AC50Hz, rated voltage 400V and rated current up to 800A, the breakers take the role of infrequent turn-on or turn-off. The breakers have overload long-delay inverse time, short-circuit short-delay inverse time, short-circuit short-delay definite time, short-circuit instantaneous and under-voltage protection performances so as to protect the circuit and power appliance from damage.

- CM1z Series MCCBs have the characteristics of compact size, high-breaking capacity, short arcover distance, isolation and anti-vibration etc.

- The breakers can be installed vertically (upright) or horizontally (transverse).

- The breakers can't be wired adversely. 1,3 and 5 can only be connected with power line; 2,4 and 6 can only be connected with load line.

- The breaker has isolation function and its corresponding symbol is shown as “”.

- The breakers comply with the demands of the following standards:

IEC60947-1 and GB14048.1-2006 General rules

IEC60947-2 and GB14048.2-2008 Circuit breakers

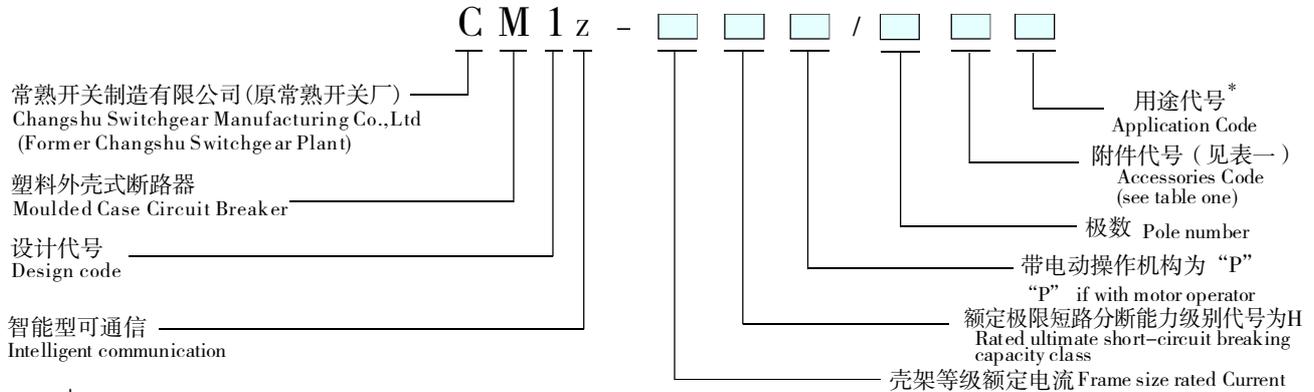

And annex F: additional tests for circuit breakers

with electrical over-current protection.

- The breakers have obtained the CCC mark of CQC.

● 型号及其含义如下 Type and its meaning

● 按产品极数分三极与四极。四极产品中性极(N极)的型式为: N极过电流保护电流、时间参数为0(即中性极无保护)或50%或100%自动跟踪相极电流、时间整定值,且N极与相极一起合分(先合后分)。

● 按额定电流分: CM1z-100为32(16~32)、63(32~63)、100(63~100); CM1z-225为225(100~225); CM1z-400为400(200~400); CM1z-630为630(400~630); CM1z-800为800(630~800)。

● 按接线方式分为板前接线、板后接线、插入式板前接线、插入式板后接线四种;

● 按断路器是否带附件分带附件和不带附件两种:

附件分内部附件和外部附件: 内部附件有分励脱扣器、欠电压脱扣器、辅助触头、报警触头四种; 外部附件有电动操作机构、断路器控制器、通信转接器、免焊连接器、FWB1温度报警模块。

● Can be classified in terms of pole numbers into: three poles and four poles. The pattern of neutral phase (N) for four-pole breakers as follows: protective current of over-current in N pole, time parameter 0 (namely, no protection for neutral phase) or 50% or 100% automatic tracking phase current, setting value of time, and N pole can be turned on or off together with phase poles (first turned on, then off).

● Can be classified in terms of rated current into: 32 (16~32), 63 (32~63), 100 (63~100) for CM1z-100; 225 (100~225) for CM1z-225; 400 (200~400) for CM1z-400; 630 (400~630) for CM1z-630; 800 (630~800) for CM1z-800.

● The wiring method has five ways: front connected、rear connected、plug-in front connected、plug-in rear connected and draw out connected.

● Can be classified into two types in terms of accessory: with or without accessories:

The accessories can be classified into: internal and external accessories. The internal accessories have four kinds of shunt release, under-voltage release, auxiliary contact and alarm contact; the external accessories have power-driven operating mechanism, controller, communication adapter and welding-free adapter FWB1 temperature alarm module.

适用工作环境及安装条件 *APPLICABLE ENVIRONMENT AND INSTALLATION CONDITION*

安装地点的海拔不超过2000m;

周围介质温度不高于+40℃和不低于-5℃, 且24小时的平均值不超过35℃(特殊订货除外);

安装地点的相对空气湿度在最高温度为+40℃时不超过50%; 在较低温度下可以有较高的相对湿度, 例如20℃时达90%, 对由于温度变化偶尔产生的凝露应采取特殊的措施;

污染等级为3级;

断路器主电路的安装类别为Ⅲ, 不接至主电路的辅助电路和控制电路安装类别为Ⅱ;

断路器适用于电磁环境A;

断路器应安装在无爆炸危险和无导电尘埃、无足以腐蚀金属和破坏绝缘的地方;

安装在没有雨雪侵袭的地方;

断路器应按产品的使用说明书安装和连线。

The elevation of the installing site doesn't exceed 2000m;

The ambient temperature is not above +40℃ and not below -5℃, and average temperature in 24 hours doesn't exceed 35℃ (except special order);

The relative humidity of the installing site doesn't exceed 50% at the maximum temperature of +40℃; at lower temperature, higher humidity would be permitted, for example, 90% at 20℃, given consideration of the dews due to the temperature change, special measures should be taken;

Pollution grade: 3;

Installing categories: III for the main circuit, II for the auxiliary circuit without being connected with the main circuit and for control circuit alike;

Be suitable in electromagnetic environment A;

There must be not any explosive medium, and any gas which would corrode metal or any non-conducting dust which would destroy the insulation;

The place would not be invaded by rain and snow;

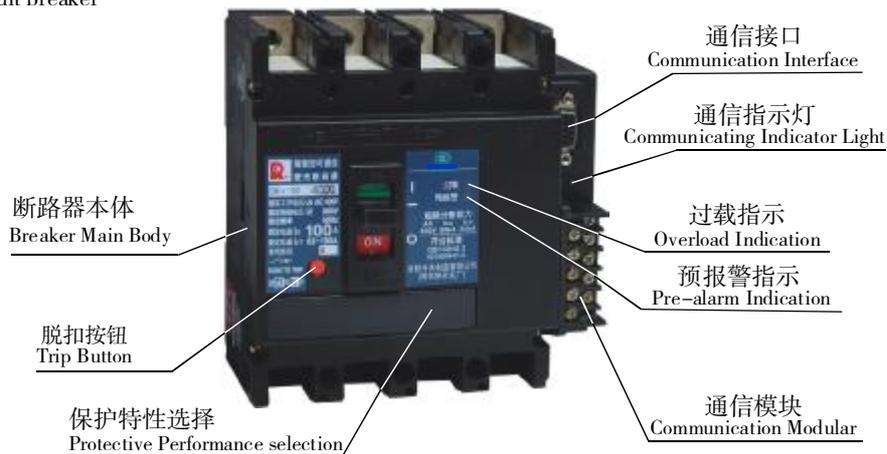

The circuit breaker should be installed and wired by following its instruction.

保护:

- 1-过载长延时动作电流Ir1调整, 根据断路器不同的额定电流, 可从4档到10档进行调整;
- 2-长延时动作时间t1调整, 可进行4档调整;
- 3-短路短延时动作电流Ir2调整, 可进行10档调整;
- 4-短延时动作时间t2调整, 可进行4档调整;
- 5-短路瞬时动作电流Ir3调整, 可进行8档、9档或10档调整;
- 6-预报警动作电流Ir0调整, 可进行7档调整。

其它功能:

- 7-测试端, 用于检测智能型脱扣器当前整定值。

Protection

- 1-For the adjustment of overload long-time delay acting current Ir1, according to different rated current, this knob can be adjusted from 4 stops to 10 stops;
- 2-For the adjustment of long-time acting time t1, this knob can be adjusted 4 stops;
- 3-For the adjustment of short-circuit short-time delay acting current Ir2, this knob can be adjusted 10 stops;
- 4-For the adjustment of short-time acting time t2, this knob can be adjusted 4 stops;
- 5-For the adjustment of short-circuit instantaneous acting current Ir3, this knob can be adjusted 8 stops, 9 stops or 10 stops;
- 6-For the adjustment of pre-alarm acting current Ir0, this knob can be adjusted 7 stops;

Other Functions

- 7-Test terminal, for the testing of present values of intelligent release.

内部附件代号 INTERNAL ACCESSORIES CODE

● 脱扣器特性 Release Feature

断路器内装按有效值采样的电流传感器。断路器具有过载长延时反时限、短路短延时反时限、短路短延时定时限、短路瞬时动作等保护功能，可由用户自行设定组成所需的保护特性。脱扣器特性见下图。

The breaker for which the current sensing means are stated to be r.m.s. responsive, it has the protection features of long-delay overload inverse time, short-circuit short-delay inverse time, short-circuit short-delay definite time, instantaneous short-circuit, etc. It can also adjusted to meet the customers' needs by themselves. See the following chart of release feature.

● 长延时过电流保护反时限动作特性见表四

Long-time delay over-current protection inverse operating characteristics see table 4

表四 Table 4

电 流 Current		动 作 时 间 Operating Time								
配 电 型 Operating distribution Type	1.05I _{r1}	2小时内不动作 No operating within 2h								
	1.3I _{r1}	≤1h动作 Operating								
	2I _{r1}	整定时间t ₁ (s) Setting time	I _{nm} =100、225A				I _{nm} =400、630、800A			
	12		60	80	100	12	60	100	150	
电 动 机 保 护 型 Motor-protection Type	1.05I _{r1}	2小时内不动作 No operating within 2h								
	1.2I _{r1}	≤1h动作 Operating								
	1.5I _{r1}	动作时间T ₁ (s) Operating time	I _{nm} =100、225A				I _{nm} =400、630A			
			21.3	107	142	178	21.3	107	178	267
	2I _{r1}	整定时间t ₁ (s) Setting time	12	60	80	100	12	60	100	150
	7.2I _{r1}	动作时间T ₁ (s) Operating time	0.93	4.63	6.17	7.72	0.93	4.63	7.72	11.6
脱扣级别 Trip class		-	10A	10	20	-	10	20	30	
<p>注：1.动作时间符合$I^2T_1=(2I_{r1})^2t_1$ ($1.2I_{r1} \leq I < I_{r2}$)； Note: 1. Acting time in line with $I^2T_1=(2I_{r1})^2t_1$</p> <p>2.动作时间允差为±20%； 2. Acting time tolerance: ±20%</p> <p>3.可返回时间不小于动作时间的70%。 3. Returnable time not less than 70% acting time.</p>										

● 短延时过电流保护特性见表五

Short-time delay over-current protection characteristics see table 5

表五 Table 5

电 流 Current		动 作 时 间 Operating Time					
I _{r2} ≤ I < 1.5I _{r2}		反时限 Inverse			I ² T ₂ =(1.5I _{r2}) ² t ₂		
1.5I _{r2} ≤ I < I _{r3}	定 时 限 Definite	整定时间t ₂ (s) Setting time		0.06	0.1	0.2	0.3
		允差(s) Allowable Tolerance		±0.02	±0.03	±0.04	±0.06
		可返回的时间(s) Returnable time				0.14	0.21

● 电动机用断路器的三相不平衡保护功能

三相不平衡保护用不平衡度 (I_{max}-I_{min})/I_{max}表示，从30%~70%可选，0代表关闭不平衡功能；不平衡动作时间范围为1~255s，0为只报警不动作。

注：用户只能通过上位机（见P26页）查询、设定三相不平衡保护参数，因此当断路器不与上位机组网并需此功能时，用户在订货时必须按“订货规范”表注明。

● Three-phase disequilibrium protection of motor-protection type

Disequilibrium level (I_{max}-I_{min})/I_{max} for three-phase disequilibrium protection, optional from 30% to 70%, 0 stands for the stoppage of disequilibrium protection; Time range of response due to disequilibrium from 1 to 255s, 0 stands for no acting but alarm.

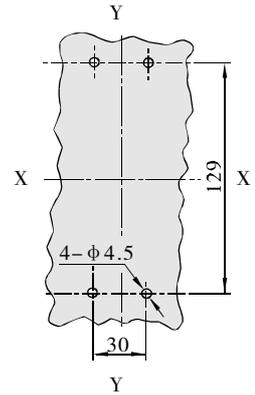

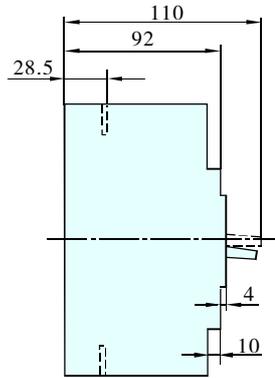

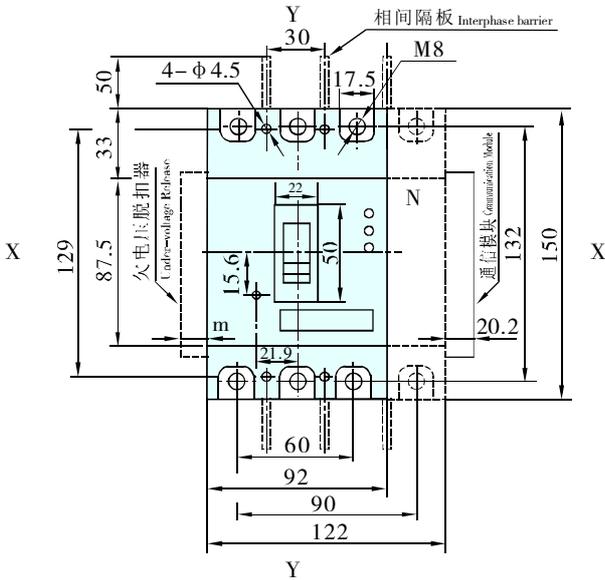

Note: The customers can check out and set the parameters of three-phase disequilibrium protection by the upper-level computer, therefore, when the circuit breaker is not networked with the upper-level computer and this function is available, the customers have to make its indication according to "Ordering Notice" when making order.

外形尺寸及安装尺寸 Outline Dimensions and Installation Dimensions

符号说明：X为接线端子排

在额定控制电源电压的35%~70%时，欠电压脱扣器应可靠使断路器脱扣；

在额定控制电源电压的85%~110%时，欠电压脱扣器应保证断路器能合闸；

在额定控制电源电压低于35%时，欠电压脱扣器应防止断路器合闸

Code indication: X for line wiring terminals

With the operating voltage of 35%~70% of the rated voltage, the under-voltage release should make the circuit breaker trip reliably.

With the operating voltage of 85%~110% of the rated voltage, the under-voltage release should make the circuit breaker be switched on.

In case of the operating voltage less than 35% of the rated voltage, the under-voltage release should prevent the circuit breaker from being switched on.

警告：欠电压脱扣器必须先通电，断路器才能再扣及合闸。否则将损坏断路器!

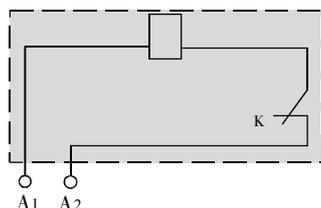

Warning: Only after the under-voltage release is electrified, the circuit breaker can be re-cramped and switched on. Otherwise, the circuit breaker would be damaged. Warning: Only after the under-voltage release is electrified, the circuit breaker can be re-cramped and switched on. Otherwise, the circuit breaker would be damaged.

接线图 (虚框内为断路器内部附件) Scheme of wiring (the internal accessories in the dotted frame)

电源输入 power supply

K: 分励脱扣器内部与线圈串联的微动开关为常闭触头, 当断路器分闸后, 该触头自行断开, 合闸时闭合
“K” is the slow motion switch normal-close contact conneted the coil in series in the shunt release. It turns-on or turns-off voluntarily as soon as the breaker on or off.

电压规格: AC50Hz 230V、400V; DC220V、24V。

在额定控制电源电压 U_s 的70~110%之间时, 分励脱扣器应可靠使断路器脱扣。

Voltage rating: AC50Hz 230V or 400V; DC220V or 24V.

The shunt release should make the breaker trip reliably when the operation voltage is 70% ~ 110% of the rated control voltage.

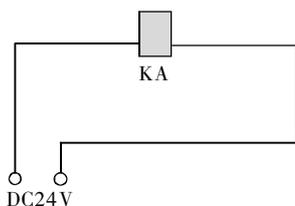

注: 当采用额定控制电源电压DC24V规格分励脱扣器时, 铜导线最大长度 (两根导线中每根长度) 须满足右表条件:

Note: While selecting DC24V (the rated control power-supply voltage) release, the maximum copper wire length (single copper wire) must satisfy requirements right table:

额定控制电源电压 U_s (DC24V) The rated control voltage	导线截面积 Wire area	
	1.5mm ²	2.5mm ²
100% U_s	150m	250m
85% U_s	100m	160m

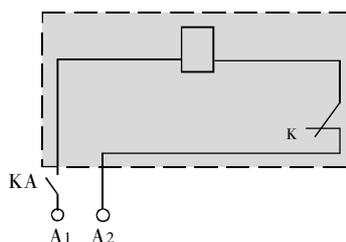

注: 当不满足上述表中要求时, 推荐采用下图进行分励控制回路设计。

Note: While don't satisfy the table, it's recommeaded to design the shunt circuit according to the following diagrammatic sketch.

KA: 为DC24V中间继电器, 触点电流容量为1A

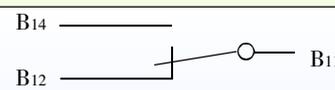

KA: stands for intermediate relay of DC24V, the current capacity of its contact is 1A

FWB1温度报警模块 TEMPERATURE ALARM MODULE

FWB1温度报警模块采用FRG热传感器直接安装在连接点位置在线检测温度，最多监测6路连接位置温度(热传感器连接至温度报警模块背面的输入端子分别为1T、2T、3T、4T、5T、6T)。当监测到连接点温度超过动作温度时，温度报警模块指示灯点亮发出相应报警指示，并且内置的继电器二路输出触头闭合（二路输出端子分别为13、14，23、24），可发出远方报警信号或使断路器跳闸；当监测到连接点温度降至复位温度时，温度报警模块指示灯熄灭并且二路输出触头断开。温度报警模块连接至热传感器的线长为1.5米。

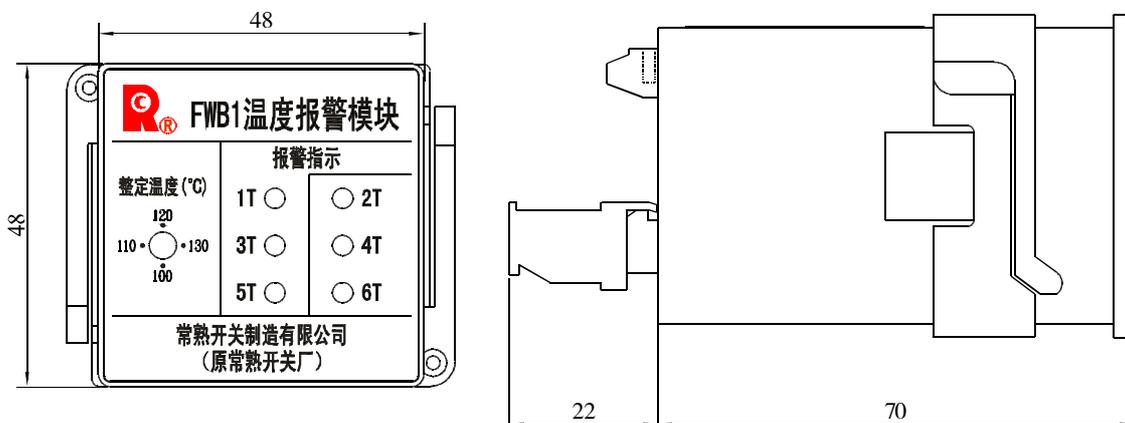

FWB1 temperature alarm module adopts online temperature detection that the FRG heat sensor directly mounted on the connection position. It can detect at most six points connection position (the input terminals on the back of the temperature alarm module, which the heat sensor is connected to, are 1T、2T、3T、4T、5T、6T respectively). When detecting the temperature of the connection points is higher than action temperature, the temperature alarm module's directive lights are on and alarming, at that time, the inbuilt relay's 2nd output contact will make (the 2nd output terminals are 13、14, 23、24 respectively); when detecting the connection temperature dropping to resetting temperature, the temperature alarm module's directive lights are off and the 2nd output contact will break. The connection wire between the temperature alarm module and the heat sensor is of 1.5m length.

测温范围 temperature detection range	0~150℃
动作温度 T_o action temperature	100/110/120/130℃
复位温度 T_r resetting temperature	$T_o-5℃$
精度 precision	$\pm 5℃$
传感器绝缘耐压 sensor insulation withstand voltage	AC3500V/1min
测温点数 temperature detection points	最多6路 6 points at most
工作电源 operating current	AC230V, 范围range 195~253V
输出触头容量 output contact capacity	3A/AC250V, 3A/DC24V
工作温度 operating temperature	-20℃~+70℃

带电动操作机构的CM1z断路器与上位机(如计算机)连接,可实现远距离“四遥”功能。

另外,加装CM1z断路器控制器(选购配件)还可在现场直接读取断路器的各项参数并进行修改。

(下表中“●”表示在该组网状态下具有此功能)

CM1z, equipped with motor operator, can realize its function of “four kinds of remote operation” at long distance by its connecting of upper-level device (for example, computer). In addition, CM1z MCCB Controller additionally equipped (optional) can read all kinds of parameters directly on site and make some modifications.

(● shown in the following table indicates that this network has this kind of function)

注:断路器在连接电源正常工作时,保护的设定值可以通过上位机软件、断路器控制器以及断路器自带的调节设定旋钮三种方式来进行修改。

在断路器未通电的情况下,并且在上次调整保护设定值时是使用上位机或者断路器控制器这两种方式进行的修改,这时调节设定旋钮的读数可能与实际保护值不一致,此刻使用调节设定旋钮来调节保护设定值是无效的,断路器在得电后仍然按照上次保存的设定值执行保护功能。

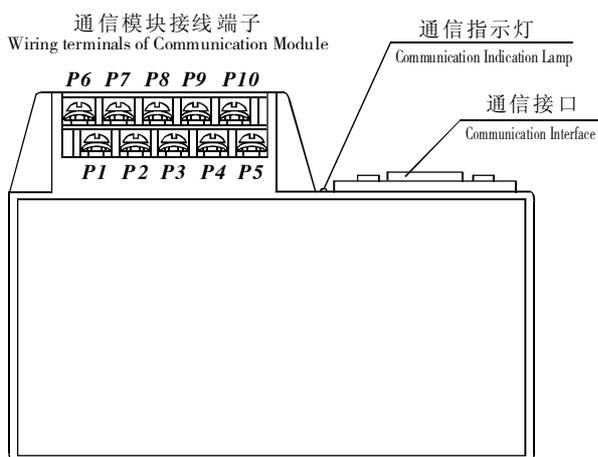

Note: When the circuit breaker is operating with power supply, the setting values of protection can be modified by three kinds of ways: Upper-level device Software, Circuit Breaker Controller and Adjustment Knob Self-equipped on the Circuit Breaker.

When the circuit breaker is not electrified and the last adjustment of setting values has been made by using the upper-level device or the controller, the setting value of adjustment knob will not be accordance with the actual protection value at this moment so that it is not valid to adjust the protection value by using the adjustment knob. The circuit breaker will still operate the protection function according to the last preserved setting value after its being electrified.

● 断路器通信接口及附件 Communication Interface and Accessories

● 通信模块 Communication Module

通信模块接线端子的接线:
The connection of Wiring terminals of Communication Module

端子 Terminals	连接 Connection
P5、P10	接电源DC24V/AC21V (推荐DC) In connection with Power Supply DC24V/AC21V (Recommendable DC)
P2	电操机构ON端子 ON Terminal of motor operator
P3	电操机构OFF端子 OFF Terminal of motor operator
P7	电操机构COM端子 COM Terminal of motor operator
P1、P6	网络控制选择 (参见注) The selection of network control (Refer to Note)

注: 1、如果P1和P6短接,则为本地控制状态。上位机此时无法对断路器进行操作和修改参数,只能读取数据,在此状态时可使用断路器控制器对断路器进行控制和参数调节。

2、如果P1和P6开路,则为远程控制状态。此时断路器控制器无法对断路器进行操作,只能查询数据,而上位机能够对断路器完成全部操作。

Note:1. If P1 and P6 are short-circuited, the circuit breaker is in the status of local control. At this time, the upper-level device can't operate the circuit breaker and make modifications of its parameters but read the data. On the current status, the circuit breaker can be operated by the circuit breaker controller and its parameters can be modified.

2. If P1 and P6 are circuted, the circuit breaker is in the status of remote control. At this time, the circuit breaker controller can't operate the circuit breaker but check out the data, and the upper-level host can fully operate the circuit breaker.

CM1z断路器控制器 CM1z Controller

可通过专用通信线（控制器附带）连接CM1z断路器。无须外接电源，可直接操作CM1z断路器合分闸，查看实时电流数据及工作状态、故障信息，并能修改各种整定参数。与CM1z断路器搭配可取代各种繁琐的控制按钮及电流表，极大的简化柜内布线。

CM1z 断路器控制器为选购配件，可对应全系列CM1z 断路器。

The controller can be connected with the CM1z Circuit Breaker by the exclusive communication line (Supplementary). Without additional power supply , the controller can directly operate the CM1z Circuit Breaker to be switched on and off, check out real-time current data and operating status, fault information, and modify all kinds of setting parameters. The controller with CM1z Circuit Breaker can substitute for all kinds of complicated control button and Current Meter, which can greatly simplify the wiring in cabinet.

CM1z Controller is optional and can satisfy full series of CM1z Circuit Breakers.

- CM1z断路器控制器的连接:

The connection of CM1z Circuit Breaker Controller

上图为断路器控制器与断路器一对一连接，其中断路器和控制器之间的专用通信线为附带配件，标准长度为2m，用户只需将该专用通信线两端分别按上图分别连接即可。需上位机通信时，只需将连接上位机的通信线按上图接到控制器背面的上位机口，上位机就可以和CM1z断路器进行通信。

CM1z断路器控制器还能与断路器实现一对多连接，此时一台控制器最多可以连接32台CM1z断路器，通过面板的选择访问连接到控制器的多台断路器的数据，但这种情况下远程通信功能将被屏蔽，上位机无法与这些断路器进行通信。

注：连接控制器和断路器时请使用附带的专用通信线，如因使用非正规的通信线而造成断路器损坏，不在本公司保修范围。

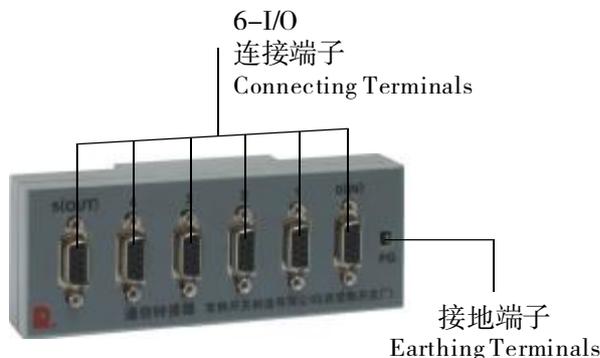

The drawing shown above indicates the one-to-one connection of Controller with Circuit Breaker. The exclusive communication line is supplementary between the Controller and the Circuit Breaker and its standard length is 2m. For customers, the two sides of the exclusive communication line are respectively connected with Communication Interface of CM1z and Circuit Breaker Interface on Controller according to the drawing shown above. If CM1z is required to communicate with upper-level device, communication line is joined with the Controller by its back interface in connection with upper-level device, which can communicate with CM1z Circuit Breaker afterwards. Compared with its direct connection with circuit breaker without Controller, the upper-level host needn't be made any changes to operate CM1z Circuit Breaker by customers.

The CM1z Controller can join together with several pieces of Circuit Breakers. At this time, one piece of Controller can join together with 32 pieces of Circuit Breakers at most and its panel can be set in order to learn the data from several pieces of Circuit Breakers. But under this circumstance, the function of remote communication will be nullified so that the Upper-level device will not communicate with these Circuit Breakers.

Note: Please use the exclusive communication line when connecting Controller with Circuit Breaker. If the circuit breaker is damaged due to the adoption of irregular communication line, the company will not certify its repair free of charge.

● 通信转接器 Communication Adapter

通信转接器可以大幅提高用户现场接线的效率和可靠性，它具有以下特点：

- ①6个RS485通信接口，最大连接5个可通信设备
- ②多个通信转接器可互联进行扩展(参见注)
- ③配有通信线接地端子
- ④可直接安装在标准35mm导轨上

注：可多次扩展，但一条线路不应连接超过32台设备。

The Communication Adapter can largely improve the efficiency and reliability of wiring on site by customers, which embraces the characteristics of :

- 1.six pieces of RS485 Communication Interfaces, can join together with 5 sets of Communicative Devices at most
- 2.Several Communication Adapters can realize the expansions by their networking (Refer to Note)
- 3.Equipped with earthing terminals of communication line
- 4.can be installed directly on the standard slideway in 35mm width

Note: can be expanded by several times, but one piece of circuit can not connect with 32 sets of devices at most.

● 免焊连接器 Connector free of being welded

免焊连接器可以让用户在现场快速、可靠的连接通信线路，无需焊接，只需将相应通信线接入接线端子即可。每套免焊连接器包括一个带DB9插座的连接模块、标准DB9插座外壳以及固定螺丝。

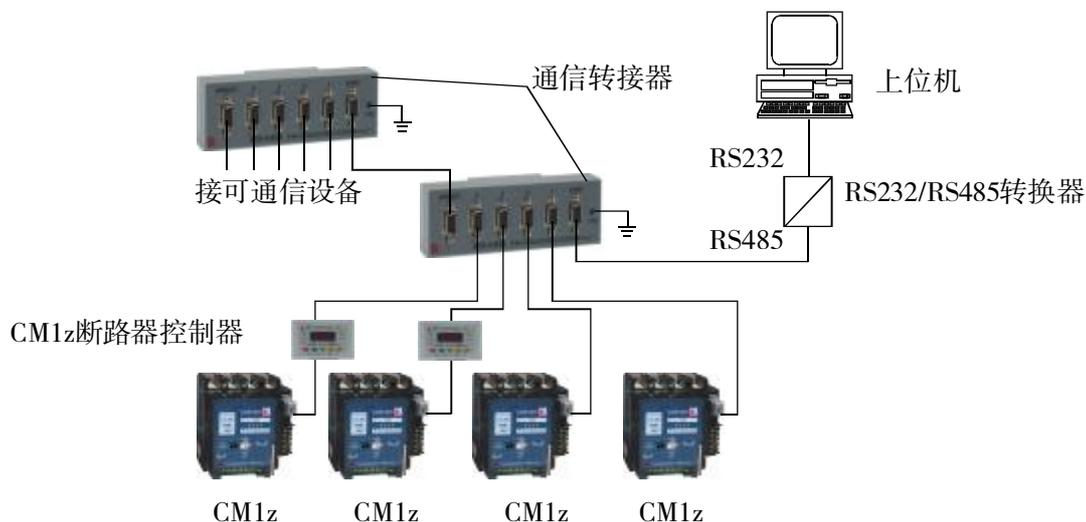

The Connector can connect with communication line quickly and reliably on site by customers, and it is free of being welded but made only by joining the corresponding communication line with wiring terminals. Each connector includes the connecting block with DB9 socket, standard DB9 socket case and fixing screw.

外形：Outline

● 断路器通信系统连接示意图

注：1.图中通信系统使用一条RS485（ModBus协议）总线，每条总线最多连接32台设备，最长接线距离1200米，并可通过中继器延长；

2.用户可通过加装RS485串口扩展卡的方式对系统方便的进行扩展；

3.用户通过上位机可对网络上每一台断路器进行实时的监视和遥控，并将数据进行分析处理，实现自动化监控功能（需上位机软件支持）；

4.若装协议转换器(选购件)，可将ModBus转成DeviceNet、Profibus等。

Note:1. One piece of RS485 Busbar is adopted in the Communication System indicated in the above scheme, each can connect with 32 sets of device at most and 1200m in length at most but can stretch its length by using the repeater;

2. The customers can expand the system conveniently by equipping with RS485 Series Interface Expansion Card;

3. The customers can realize the real-time monitoring and remote control of each pieces of Circuit Breaker in the network, and analyze and deal with the data to realize the function of automatic monitoring. (under the support of Upper-level device)

4. If the protocol converter (optional) is equipped, Modbus can be converted into DeviceNet, Profibus etc.

订货须知

Ordering Notice

(一) 用户务必确认对本产品技术资料已有详细了解, 并应根据断路器将来使用的场合, 按“订货规范”表订货。

(二) 如用户订货时对智能型脱扣器保护参数不作要求, 本公司将按“智能型脱扣器出厂整定值”表配置。

Users should make sure of their detailed acquaintance of the products' technological materials and make ordering by the ordering notice in terms of future applicable situations of the circuit breakers.

The company would configure by "Factory" s setting values of the intelligent release" if users had no requirements of protection parameters of CM1z circuit breakers when making order.
